Team,

Here are the specs for your first project.

Basically, you will display timesheet detail for an employee who signs into the system.

Step 1 – Sign in

In your first iteration, allow any netID to be entered.

Step 2 – Display Timesheet History

I've included a sample data file. You should expect this to change (The schema and the amount of data).

Your goal is to create a complete product (you do not have to complete the requirements for this projects, but your program must be complete – Coded, Tested, Documented, Complete Unit Tests).

Expect Changes after the Product Owner reviews your first delivery.

Please Do the following:

- 1 – Break this project down into tasks
- 2 – Estimate the time for each task
- 3 – Figure out what you can finish in the first sprint
- 4 – Split the tasks and do the work
- 5 – Do the sprint review

If you have any questions or problems... see me!

Don
